### ***Examiner's Detailed Office Action***

1. Claims 23 – 26, 29 – 37 and 40 – 44 are allowed.
2. Claims 1 – 22, 27, 28, 38 and 39 have been canceled,
3. The objected limitations in forth dependent claims 27, 28, 38 and 39 (forth office action) have been included in independent form (claims 23 and 34) in the response filed on February 17<sup>th</sup>, 2009.

### **REASON FOR ALLOWANCE**

The following is an Examiner's statement for reason for allowance:

4. Claims 23 – 26, 29 – 37 and 40 – 44 are considered allowable since when reading the claims in light of the specification, as per MPEP 2111.01, none of the prior art of record teach or render obvious applicant's claimed invention. In particular, as pointed out below, the art lacks certain features and the combination as specified in the respective claim(s).
5. The features recited in claim 23, "An apparatus comprising: an at least partially automated microscope including at least one configurable subassembly having at least one element, the at least one element having a plurality of positions; and a computer associated with the microscope, the computer including: a display configured to depict a plurality of user interfaces, each user interface including at least three areas, a first area of a first user interface depicting a selection of at least three modules including a first module providing a configuration

of the microscope, a second module providing a fine tuning and a third module providing an operation of the microscope".

6. The features recited in claim 34, "A method for configuring an at least partially automated microscope including at least one configurable subassembly having at least one element having a plurality of positions, the method comprising: depicting a first user interface and a second user interface on a display of a computer associated with the microscope, the first and second user interfaces each including at least three respective areas, a first area of the first user interface depicting a selection of at least three modules including a first module providing a configuration of the microscope, a second module providing a fine tuning and a third module providing an operation of the microscope".

as mentioned above, the art lacks certain features and the combination when taken in context of the claim(s) as a whole, was not uncovered in the prior art. Moreover, the dependent claims 24 – 26, 29 – 33, 35 – 37 and 40 – 44 are allowed as they depend upon an allowable independent claim(s).

7. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments regarding Statement of Reason for Allowance".
